

About Randy & Simon

Thank you for purchasing a product from us – We value the trust you have placed in us and though we would tell you a little bit about us, so here is a brief introduction to both Randy & Simon with some links at the end to some of our other products that you may find useful!

I'm Randy Smith. I own and operate several websites some of which are detailed on my own blog at [RandolfSmith.com](#) I've been 'working' online since 2000 and been making a regular income since late 2005. (Yep plenty of years of failure, or did I mean learning experiences, before I got serious).

I'll say upfront - I'm no super star guru or millionaire! But I do know what I know, and I hope that my products help you learn what you need to know to move yourself to new levels in your online adventures. I won't give you a full life story.... it would hardly be relevant, and just fill pages with boring details you don't want to know ... (smile) What is relevant is my career history.

My background offline was of over twenty years in direct sales & marketing. I've sold everything from Double Glazing to Time Share to Cable TV & Telephones, Right through to owning a furniture store.

Online I have a multitude of websites in my own business, and also do part time consultations for some of today's Big names! – Including actively selling High Ticket coaching programs.

So basically – I'm still, and always have been a Sales Professional at heart!

I'm Simon Phillips, I partnered up with Randy Smith when I came to the realization that I'm a TECHY. Yep - My background is and has been since I was TEN YEARS old (and I'm 42 now!) writing code and doing techy things :)

I've never been a marketer as I love the technical side of things too much. Ever since I wrote and sold my first computer game code back in the eighties I've loved nothing more than writing code to solve problems for others, or discovering new ways to make things work.

Being techy means my partnership with Randy has really helped us both as combining our skill sets leads to some very profitable websites. It also means we can both 100% satisfy our clients by knowing everything from the basic tech challenges most have - right through to the selling and marketing of their websites.

We both hope that by us working together we can help more people achieve success in their own right. So rest assured - whether you have challenges with one side or other during your online adventures.... We're here to help ☺
